

e-Stet Celebrates Four-Year Anniversary and Announces Staffing Additions and Technology Investments

Company makes significant investments to respond to continued growth

LOS ANGELES – MAY 4, 2010 – e-Stet, a global provider of electronic litigation support services, today announces that it is celebrating four years in operation and continues to experience record growth. In response to this growth, the company has made staff additions to the Los Angeles and Washington, D.C. locations, and has invested in technology offerings to ensure clients have access to the best resources available.

e-Stet offers comprehensive solutions to streamline the discovery process from the smallest to the largest projects. e-Stet has worked with some of the nation's largest and most reputable law firms to guide them through the complex issues around e-discovery.

Staffing investments include additional project managers to ensure the highest level of service to clients, achievable by maximizing defensibility as well as prompt attention to pressing case needs.

Technology investments include:

- Developmental advances of user interface and reporting capabilities in e-Stet's homegrown project management portal, LIVE.
- Investments in upgrades to its Relativity hosting environment to increase storage space and optimize speeds.
- Forty percent increase in Venio FPR processing power to ensure speedy delivery of data.
- Offering Equivio's near duplicates, threading and relevance products.

"We are very excited to be celebrating our four-year anniversary. The company continues to experience rapid growth, due in large part to our insistence upon providing excellent client service. We are committed to making the investments necessary to ensure that all available technology offerings are at our clients' fingertips," stated Salim Elkhou, CEO and founder of e-Stet. "Our goal is to make e-discovery as simple as it can be."

About e-Stet

e-Stet (www.e-stet.com) is a global provider of electronic litigation support services. Founded in 2007, the company offers comprehensive solutions to streamline the discovery process. By employing a staff of computer scientists and attorneys, e-Stet provides clients with a wide range of resources in the legal technology market.
