

e-Stet Becomes Relativity Certified Reseller

LOS ANGELES – OCTOBER 26, 2011 – e-Stet, a specialized provider of electronic litigation support services, today announces it is offering kCura's Relativity as a certified reseller, further expanding its relationship with the e-discovery review provider.

As a Relativity Certified Reseller, e-Stet can now offer its clients an on-premises license of Relativity, as well as the option to host clients' Relativity licenses in its own data center as a managed service offering. "With our service offering, clients can control their Relativity environments with an additional level of support and expertise, further enabling them to focus their resources on what they do best," stated Salim Elkhou, founder and CEO of e-Stet. "We are excited to add more Relativity options to our slate of services."

Relativity is the web-based e-discovery review platform that gives users the flexibility to design and automate their review workflow, and provides the scalability to handle the industry's largest cases. Advantages of Relativity include computer-assisted review that allows users to more effectively search large volumes of data, as well as visual data analysis tools that help reveal trends in a case. By building applications on top of Relativity, users can also manage tasks and address unique challenges before, during, and after review.

"We're excited to recognize e-Stet as a Relativity Certified Reseller," said Andrew Sieja, president and CEO of kCura. "With their emphasis on technical expertise and over three years' experience as a Relativity partner, we're confident that e-Stet will continue to provide their clients with great Relativity service and support."

About e-Stet

e-Stet (www.e-stet.com) is a full-service provider of litigation technology services. Founded in 2007, the company offers comprehensive solutions including hosted electronic discovery review, managed technology infrastructure, mobile data collections, mobile processing, defensibility consulting, backup tape restoration and artificial intelligence coding. By employing a staff of computer scientists and engineers, e-Stet provides its clients high-level technology support in the legal office.

About kCura

Recognized as a "Leader" in Gartner's 2011 E-Discovery Magic Quadrant and one of Chicago's 101 Best and Brightest Companies to Work For, kCura are the developers of the e-discovery software Relativity, a web-based platform for the review, analysis, and production of electronic data. Relativity has more than 40,000 active users worldwide from organizations including the U.S. Department of Justice and 95 of the top 100 law firms in the United States. Relativity also powers Method, kCura's workflow and notification system for managing legal hold and risk assessment processes. kCura helps corporations, law firms, and government agencies meet e-discovery challenges by installing Relativity and Method on-premises and providing hosted, on-demand solutions through a global network of partners. For more information, contact kCura at info@kcura.com or visit www.kcura.com.
